

Emkarate RL POE Lubricants

Emkarate RL refrigeration lubricants are designed to meet the requirements of compressor manufacturers and service engineers.

What's in it for you?

- **Emkarate RL lubricants are approved by most of compressor manufacturers.**
- **The product line features more than 30 products offered in varying viscosities between 5 cst to 220 cst and have been developed for use with a wide range of refrigerants.**
- **The Emkarate RL products ensure excellent refrigerant/lubricant solubility, optimum viscosity and lubrication performance across the extreme pressure-temperature ranges encountered in today's compressor systems.**

Size tank available:

From 1 litre to 200 litres

Emkarate compatibility:

All CFC, HCFCs, HFCs, carbon dioxide (R744) and hydrocarbons (e.g R-290, R600a) refrigerants. The range offers CO2 compatible reference, so that select the right reference, please contact us. Emkarate RL lubricants are not compatible with ammonia (R-717)

Elastomers compatibility:

Generally acceptable: HNBR, NBR (Buna-N), NYLON-6,6, TEFLON

Marginal: EPDM (EPR), NEOPRENE

Generally unacceptable: Butyl rubber, Fluorocarbon Rubber (FPM) (Viton), Natural Rubber (NR)

NBR/HNBR should exceed >36% nitrile content. Elastomer compounds supplied by different suppliers can yield different results. Individual testing of specific products is highly recommended.
